## Progress Bakery

PHONE 404.

Appetite testers, everywhere. Be bakery wise. You know full well that some bakers carry a higher line of bread, cakes, pies, cookies, doughnuts and bakery goods than others and it is common sense the one that has the trade carries the goods. We have both. Our shelves are always well stocked with first class goods. We employ only expert bakers and our delivery service is matchless.

## WHERE DO YOU EAT?

AN IMPORTANT QUESTION.

Your health depends upon the right answer. This matter of food should be given more attention by each individual. It is true the government has passed

THE PURE FOOD LAW

but there is no law against dirty, ignorant cooks. "What do you eat?" and "How is it prepared?" are just as important. We answer these questions to the satisfaction of both your palate and health.

## MINERAL OUTPUT OF MONTANA AND ARIZONA FOR THE YEAR 1913 SHOW CONTINUED IMPROVEMENT

The total value of gold, silver, copper, lead and zinc produced by deep and placer mines in Montana in 1913 was somewhat over \$59,000,000, a decrease from \$64,754,615 in 1912, over 8 per cent, according to preliminary estimates of V. C. Helges of the United States geological survey. Metal prices were slightly less than those of 1912, but there was also a large decrease in copper yield and consequently in gold. These were in part offset by a record increase in zinc production and silver output from zinc ores.

The gold yield decreased nearly 12 per cent, the mine figures being \$3,625,235 in 1912 and \$2,194,000 in 1913. There was no great change in the placer output, but a decrease is noted in gold from copper ores and from silicious ores. The North Moccasin mine in Fergus county was successfully operated by the Barnes King Development company and an average of 4000 tons of \$10 ore was treated per month. The Ruby Gulch mine in Blaine county was productive until August 7, when the cyanide plant burned. In Deer Lodge county the Southern Cross mine, owned by the Anaconda Copper company, was producing the latter part of the year.

An increase of nearly 4 per cent was made in the silver output of the state, the mine figures being 12,731,638 ounces in 1912 and 13,203,000 ounces in 1913. A decrease of about 10 per cent in silver output from Butte copper ores was largely balanced by an unusual increase in silver from lead concentrate and zinc residues from the Butte & Superior mine, which made a notable record the last half of the year. Over 15 per cent of the total value of the state output was that of silver. The new concentration and cyanide plant of the Butte Central at Butte was idle after a few months operation and results did not affect the gold and silver output.

The copper output declined about 9 per cent, from 399,728,873 pounds according to mine reports, in 1912 to 380,658,000 pounds in 1913. This last was about 20 per cent less than the output of Arizona, the leading copper producer in 1913. The average price of copper decreased from 16.5 cents in 1912 to about 15.37 cents in 1913, and it is presumed that no efforts toward a record output were made by the larger smelting establishments. According to monthly printed statements, the Anaconda Copper company was making an average of 22,000,000 pounds per month and the East Butte Copper company about 1,125,000 pounds per month. The February production of Butte was to some account of cold weather and fires in the West Colusa mine, which interrupted work in the Mountain View mine.

The lead output increased from 7,446,749 pounds in 1912, according to mine figures, to 8,547,000 pounds in 1913, or nearly 15 per cent.

A record production of recoverable spelter was made from zinc concentrates shipped from Montana mines in 1913. From 26,018,881 pounds of spelter in 1912, the output increased to 35,449,297 pounds in 1913, or 217 per cent. This was largely due to results at the Butte & Superior mine. The first half of the year the plant was treating 500 tons per day, but the tonnage treated was increased to 1000 tons per day the latter part of the year.

In 1913 there was a record mine

## NOVEMBER REPORT OF CONSOLIDATED

OVER 900 TONS DAILY TREATED, WITH A NET SAVING OF \$170,779.34.

The final report of earnings at the Goldfield Consolidated Mines company for November shows net profits for the month exceed preliminary estimates, issued early in December. Operating costs have been further reduced to \$5.88 per ton net and the cost of new development work was lower than the past, being \$4.48 per linear foot.

An indication of the fact that new deposits of rich ore may be found in unexplored portions of the territory of the Consolidated company is found in the statement that a quantity of \$40 ore has been exposed in the caving of a part of the great glory-hole of the Combination. The report states that good ore continues to come from the old lease workings on the Mohawk and near the western boundary line of that famous mine affording ground for the belief that the extension of some of these bonanza ore bodies will be found in exploring adjoining properties.

Some of the most interesting work in Consolidated territory and of greatest significance to the future of

the district is that now being conducted at great depth, on the 1300 and 1400-foot levels of the Grizzly Bear mine. It is also of interest to know that the ore has been followed from the Mohawk workings into the Combination Fraction ground, opening up new possibilities for the development of valuable deposits in this territory.

For November, 1913, the total production was 28,947 tons, from which resulted net realization of \$170,779.34.

## CONDEMNED MAN SAYS HE SLEW A GEM BROKER

STORY CANNOT BE VERIFIED AFTER AN INQUIRY BY THE POLICE.

(By Associated Press.)

LOS ANGELES, Dec. 31.—Police doubt the confession yesterday of Burr Harris, the negro condemned to death for the murder of Mrs. Rebecca Gay, a Christian Science practitioner, that he also murdered Charles Pendell, a wealthy diamond broker, last June. Harris said he escaped in a stolen automobile after the Pendell crime, but the police records fail to show such theft of an automobile.
